Price \$145.00

CAMPING

BUNGALOW

PATENT APPLIED FOR

- Storage** Occupies little storage space.
- Appearance** Attractive
- Use** Ideal for camping, sleeping in yard, play house, summer house, hospital, booth at fair, etc.
- Construction** The Camping Bungalow consists of a strong framework, made of light well-seasoned wood, stained a pleasing color. To this are attached frames covered with canvas, and a canvas roof.
- The floor has air spaces underneath it, so that it is never damp and always well ventilated.

CAMPING

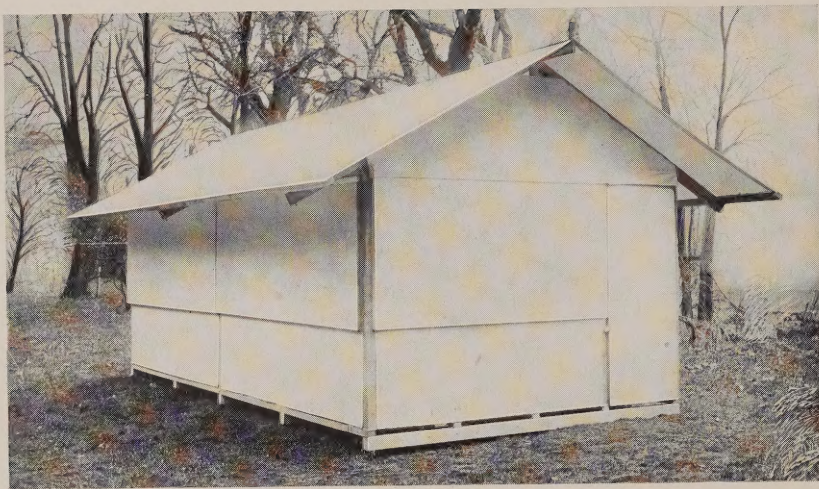

BUNGALOW

PATENT APPLIED FOR

The lower canvas frames are set rigidly between the posts. The upper frames are attached at the top so that they can be pushed outward and upward at the bottom making an awning-like appearance. When shut they can be securely fastened. They are made from 10 ounce canvas.

The roof is one large piece of rain-proof canvas (12 ounce), which projects on all sides allowing an opening between it and the frames below.

This open space under all edges of the roof ventilates it so that the camping bungalow never has the close, oppressive air that is common to dwelling and tent on a warm summer day. It also causes a good ventilation, without draft, when all sides are shut.

CAMPING BUNGALOW, SIDES SHUT
Size 10 Feet by 14 Feet Weight 600 Pounds
Price \$100.00

CAMPING BUNGALOW, OPEN ON ONE SIDE AND END
Size 10 Feet by 14 Feet Weight 600 Pounds
Price \$100.00

BUNGALOW

PATENT APPLIED FOR

THE PLEASURE OF IT

On a warm, still day or night all the sides can be raised; you are then practically out-of-doors.

On a bright, sunny day the awning-like sides give a grateful protection to the eyes.

During a heavy rain the leeward side can be raised with perfect protection and comfort.

It gives the feeling of the open; the shut-in-ness of dwelling and tent is absent.

Healthful ? Yes !
